GIVING SHAPE SIGNIFICANCE

Outer brilliance for inner values

With perfection and passion

Established in 1865

Competence in glass

WALTHER CRYSTAL Brilliant crystal glass

CRYSTAL is the brilliant crystal glass collection WALTHER stemware. WALTHER CRYSTAL combines the unique properties of various magnesium compounds in impressive glass perfection.

WALTHER CRYSTAL is:

- crystal clear and brilliant
- strong and robust
- flexible and elegant
- light and dynamic
- scratch-proof and dishwasher-safe

It's Magic Durable outside – Elastic inside

Magnesium glass

Magnesium is also used in glass craftsmanship. If combined with the right elements, its enormous potential will start to unravel. We use exactly this combination in order to create a robust glass that is high in durability.

As brilliant as crystal, hard beyond compare yet elastic.

Magnesium glass, the perfect shape for equally perfect contents.

The quality

Minimum weight, maximum stability, high dynamics and an unmistakable look make it WALTHER CRYSTAL.

Rejoice in the brilliant and crystal clear glasses, which are highly resistant to scratches due to their unparalleled hardness. When it comes to compatibility with dishwashers these glasses simply smile. Natural acids and strong alkalis do not harm this glass.

The process

Industrial glass production is an art form in itself; particularly in combination with magnesium.

Molten glass is produced from raw materials of the highest quality at temperatures of 1.500 degrees Celsius. The fluid glass is pressed into form and adopts its final shape at around 1.000 degrees Celsius.

The following fire polishing process guarantees that the slightest imperfection is leveled out. The magnesium compounds mean that the elasticity modules are increased and the tensile and bending strength of the glass is maximised. Our responsibility is to meet the highest demands of resplendent and durable products.

Unique. Graceful. Flexible. FRANCINE

FRANCINE – each one of a kind and all equally beautiful!

A romantic dinner for two, lunch with friends or a big celebration. With FRANCINE you will have things brilliantly in shape.

Lifestyle and spirit determine your choice of drink and, whether it be a red or white wine, champagne, shaken or stirred martinis, draft beer, sweet liqueurs or exotic cocktails, they can all be savoured from the FRANCINE range. Unique, graceful and flexible.
